

## **FUTURE**

You used to think there was **no future**  
You used to think there was **no good here**  
You used to fear that you were **useless**  
And be peer pressured to **act foolish**  
And believe that you were all alone  
That there was no hope  
But now you know...

Those ideas were planted there by the ones ... 'running the show'

**Cause only if you think that you are weak**  
Would you settle for a life of hypocrisy  
Of seeing tragedies unfold in front of your eyes  
And do nothing about it – be paralyzed

Fearful, frightened  
What could, what might and ... what might not happen  
if you go against perverted power speak about elephants in the room  
evil spirits had to conspire so your soul could only think of doom

But doom thinking man and doom thinking girl  
Are about to wake up to the **beauty** in the world  
See how deception has kept you small  
And finally see **you're not powerless at all.**

**Look at you:** You are a pillar for peace  
If you abandon your fear: just let go – just release

**And see the future – see you are part of it**  
Feel the beat, feel the flow, feel the heart of it

See the goodness, the kindness, your resilience and dignity  
Recover your faith, move beyond the grieve  
Cause the future needs you... needs you to believe  
And use that believe as a strong base  
To heal global P.T.S.D with great haste

**The future is strong – the future is brand new**  
**Shining lights into darkness: the future... is you**
